Description:
Liquid Acti-Gel® 208 is a high quality, purified magnesium aluminosilicate pre-dispersed in water and intended for high performance as a thixotrope, reinforcement additive and anti-settling agent in areas where the addition or metering of a liquid is preferable to using a dry powder.

Typical Physical Properties:
- Solids Content: 19.5%
- Viscosity of Dispersion: 100 cP
- 325 Mesh (45µm) Residue: 0.01%
- pH: 7.0—9.5
- Specific Gravity of Dispersion: 1.14
- Color: Pale Yellowish/Brown to Gray

Typical Chemical Analysis of Solids (%):
- SiO₂: 55.2
- Al₂O₃: 12.2
- Fe₂O₃: 4.05
- TiO₂: 0.49
- P₂O₅: 0.65
- CaO: 1.98
- MgO: 8.56
- K₂O: 0.68
- Na₂O: 0.53
- LOI: 15.66

Packaging:
- IBC Totes—264 gal / 1,000 Liter
- Bladders (20 ft. Container) - 5,000 gal / 19,000 Liter
- Tanker Truck— up to 5,000 gal / 19,000 Liter

Storage Recommendations:
AGITATE BEFORE USE
Store in a cool dry place and out of sunlight. If product freezes, thaw and agitate to remix the product. Liquid Acti-Gel® 208 does not lose performance due to freezing or exposure to extreme heat.

Regulatory:
For the most current regulatory status, refer to the SDS for Liquid Acti-Gel® 208. It may be viewed and downloaded at our website, www.actic-gel.com.

Quality Assurance:
Active Minerals International is ISO 9001:2008 certified which guarantees all operations are conducted according to stipulated standards.

All of the above information provided is presented in good faith, based on our testing and experience, and believed to be accurate. No guarantee, either expressed or implied, is made with respect to the infringement of any patent. These values represent typical data from samples taken from production batches. They are not to be considered specifications. Results may vary depending upon equipment and procedures. The user of these materials is responsible for determining its suitability for their application.
